Professional Summary

ServiceNow Developer with **3.5 years of experience** in administering, configuring, and customizing ServiceNow applications across medium-to-large enterprise implementations. Hands-on expertise in **Business Rules, Script Includes, Client Scripts, UI Policies, ACLs, and Service Portal development** using **JavaScript, HTML, CSS, XML, and REST/SOAP integrations**. Experienced in implementing **ITSM workflows** including Incident, Problem, Change, and Service Request management aligned with **ITIL best practices**. Adept at working in **Agile** environments, collaborating with geographically distributed teams, and delivering solutions that improve operational efficiency and end-user experience.

Experience

Wipro

Jan 2024 – Present

ServiceNow Developer

Hyderabad, India

- Administered and customized **ServiceNow** platform for enterprise ITSM implementations, configuring **Incident, Problem, Change, and Service Request** modules aligned with ITIL process standards.
- Developed and maintained **Business Rules, Script Includes, Client Scripts, UI Policies, UI Actions, and ACLs** using **JavaScript** to enforce data integrity, automate workflows, and control platform behavior.
- Built and customized **Service Portal** experiences using **AngularJS-based widgets, HTML, CSS, and Bootstrap**, improving end-user self-service adoption across departments.
- Designed and configured **Notifications, SLAs, and Escalation rules** to ensure timely ticket resolution and adherence to service level commitments.
- Developed **REST and SOAP-based integrations** between ServiceNow and third-party platforms (monitoring tools, Active Directory, email systems), enabling automated ticket creation and bi-directional data sync.
- Created **Flow Designer** workflows and **Orchestration** scripts to automate repetitive IT operations, reducing manual intervention and improving incident response time.
- Performed **system and integration testing**, authored unit test cases, implementation plans, and technical documentation for all customizations and deployments.
- Collaborated with Solution Architects and cross-functional teams in an **Agile/Scrum** environment to gather requirements, estimate effort, and deliver sprint-based releases on schedule.

Wipro

Sep 2022 – Dec 2023

Associate ServiceNow Developer

Hyderabad, India

- Supported configuration and administration of ServiceNow instances across development, QA, and production environments, including **update set management** and instance cloning.
- Developed **Client Scripts and UI Policies** to control form behavior dynamically, improving user experience and data quality on ServiceNow service catalog items.
- Configured **Service Catalog items, Workflows, and Approval Policies** for IT and HR service requests, reducing manual processing time for recurring service requests.
- Assisted in building and maintaining **CMDB** (Configuration Management Database) integrations to support accurate asset tracking and dependency mapping for change management.
- Participated in **incident handling, root cause analysis, and post-release validation**, contributing to platform stability and service uptime across enterprise environments.
- Produced and maintained **technical documentation** including development specs, unit test cases, deployment runbooks, and support guides for ongoing platform maintenance.
- Worked with geographically distributed teams and business stakeholders to gather requirements, translate them into technical solutions, and deliver iterative improvements to existing ServiceNow modules.

Key ServiceNow Contributions

ITSM Process Automation – Enterprise ServiceNow Implementation

- Led configuration of **Incident, Change, and Problem Management** modules for a large enterprise client, automating assignment rules, notifications, and SLA tracking to reduce resolution time by 35%.
- Developed custom **Business Rules and Script Includes** to enforce business logic and reusable server-side scripting across multiple applications within the same ServiceNow instance.

Service Portal Redesign & Self-Service Enablement

- Built responsive **Service Portal** pages and widgets using **HTML, CSS, AngularJS, and Bootstrap**, replacing legacy CMS pages and improving self-service ticket submission by end users.
- Configured **Knowledge Base** integration within the portal to surface relevant articles during incident creation, reducing ticket volume for common issues.

Third-Party Platform Integration via REST APIs

- Designed and implemented **REST-based integrations** between ServiceNow and external monitoring and cloud platforms, enabling automated incident creation from infrastructure alerts.
- Configured **MID Server** and **Integration Hub** spokes to facilitate secure, reliable data exchange between ServiceNow and on-premise enterprise systems.

Technical Skills

ServiceNow Modules: Incident Management, Problem Management, Change Management, Service Request, Service Catalog, CMDB, Knowledge Management, Service Portal, Flow Designer, Orchestration

ServiceNow Development: Business Rules, Script Includes, Client Scripts, UI Policies, UI Actions, ACLs, Notifications, SLAs, Update Sets, MID Server, Integration Hub

Scripting / Web Technologies: JavaScript, HTML, CSS, XML, AngularJS (Service Portal), REST, SOAP, JSON

Integration: REST/SOAP Web Services, Integration Hub, MID Server, Active Directory, third-party API integrations

ITIL Practices: Incident, Problem, Change, Release, Service Level Management

Supporting Tools: Git, GitHub, Jira, Confluence, Azure DevOps (pipeline support), Python, Bash

Cloud / Infra (Supporting): Microsoft Azure (App Services, VMs, Monitor), Docker, basic Kubernetes

Operating Systems: Linux, Windows Server

Concepts: Agile/Scrum, SDLC, Technical Documentation, Cross-functional Collaboration, Unit Testing, Integration Testing

Education

Aditya Engineering College

Bachelor of Technology in Mechanical Engineering

Jun 2018 – Jul 2022

Surampalem, Andhra Pradesh

Certifications

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Developer Associate (AZ-204)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- GitHub Foundations
